

序言与縮寫

這“**実録**”是為台灣屏東縣佳冬鄉佳冬村林任坤後代編寫，只供他們及在“**実録**”中有提到的親戚私人參考用，是用私人電腦編寫与印刷。不少資料是熱心的親友供給或公共免費的網絡上得來，有不妥，不對或不全的地方請提到的親戚“**當事人**”多包涵，請通知編寫本人一有机会時修正，增補或刪除

幼時常去父親的西醫及祖父(他哥哥主持)的中医診所与药房，有時還在那裡過夜，幫忙配药(西医)或用脚輪刀磨碎草药，更高興喝甜的药水(西医)与啃甘草(中醫)。現在在那裡与西方一直以來，醫師診所与药劑師药房屬於不同職業。另外，有些醫生的主要工作也在法律上由非医生做，如執業与麻醉護理師。有少數医科畢業生(往往是高材生)只做基礎學科(如我一段時間從事的人体寄生虫学，及我几位上司研究与教学，從不看病人，也 從不直接做診病与治療的工作。医生的工作已擴大到其他行業及人員。在20世紀初中醫頻臨消失，中國大陸的中央政府大約於1920-1930還明令停發中醫師執照。現在，這三千年的職業已恢復如往並与西醫同等重要。然，它還需要更多被瞭解及西方標準的科学根据，包括大家熟習的針灸療法，或許它要与西醫用的不同方法去驗證。

念中学时，課餘及假日常在家父的延德醫院的药房當药局生,按處方配药，粉药用小方紙分成几小包，收醫药費。醫院於1950左右搬回萬建村住家後 我還两次把药房重新佈置，櫃檯換边及內門內移。很多時候，在過年前几天，家父給我帳單去病患家補收醫药費，往往拿到農產品代替。上大学及留美當研究生時發現醫學教育方試之特別。在大学我有一大半是念獸醫的，其主要科目與醫科相似，但比較種數多很冗詳細,教授一搬要教西三门課，每門只有他一人講，但其實驗部份全由助教負責。在醫科，同樣一門課是一批人(5 - 10 几人)分担，實驗部份老師陣容更大，教授,助教及研究生(必要的实習)都參加。在當微生物学研究生時，與醫二学生上醫用微生物学(選研究生課前必修的)外，也跟他們一起上別的課如醫一的生化及組織学与醫二的病理学，這些几年前 在念獸醫時也有過,但上課情形及語文(醫學名詞)很不同及新智識。這不同一部份由於醫科是200学生班,,我的獸醫班當時少於20人。

及就業，在四所醫學院做事及两大子學醫行醫，再加上有不少行醫的親友及球伴，更深感醫師的特別，是無日夜的職業，一天24小时，一个礼拜七天工作，家母常半夜三更要為出診回來的家父去打開有30房的的大屋大門”,早上家父未起床前常有病人家屬圍坐在他床边，風雨無阻，人命關天的行業，他們常明知不可為而為，或極短時間內決定。如資訊所述，尤其是電視，其學習與訓練過程也辛苦与漫長。

再過了几十人年老了我才意識到我林家及醫護職業是獨特的。在1980 我岳父(退休小学校長)由台灣來美国旅遊到邁阿美我家帶來台灣時報1981的一頁，上有一篇“十全十美好家教，……,屏東佳冬村林家，近三十年，出了卅五位醫師”列出他們的名字並述“諒在全国(中国)亦別無分號”(見文獻GA3)，几年後這事被電視報導，多了西醫師;因此，有一在萬建村林家家屬住家被認為是厂史古蹟 (見GA4-6)。据一論文報導(GE2)，此事源自林其樹。他開有中醫及药房，資助林其忠、林其謙兄弟及几位親戚完成西醫學教育。這兩位兄弟是佳冬小農村林家的头两位西醫師及醫護業的傳統創始者，但也導致過多的醫師在家鄉，及為此職業而遠徙他鄉 或離開台灣，造成林姓一小族的又一連串的大遷移。這次在林姓家族三千年裡在進行，原因/動机 及範圍上是獨特的，主要是為了醫護職業，並在几十年內又一次分批大量移住到不同的遠處。因上述種種我寫了這小冊記錄佳冬林家百年來醫药發展的概况，留存世上。

林姓已有三千年，開始於很獨特的厂史事件。它已有不少不同的故事及傳說搬在電影、電視、野史及小說上.三千年前年出生在中国北部河南省冀州的林豎是世界漢民族的林姓始祖。据說其父比干(公元前1049年出生)是商朝644年的最後君主(荒淫的紂王)的親叔父(兼宰相)，因苦諫(在王宮外跪三天夜)被紂王剖心致死。其一妃避居產子於樹“林”中石室，此子因其父之忠烈而得周武王賜姓林。其部份後代因戰亂或謀生南遷經由山、東、福建、到廣東。林喬鳳(來台始祖)與其弟由梅州白馬村約250年前(清乾隆帝時)渡海峽到台灣島南部，在坎頂暫住後定住在稍南的茄苳脚。這地方因樹得名，本是平埔族村落，於1920 改名成同音的“佳冬”，這之前建有四柵門及部份城牆防外敵(如1895 的日軍)。在原住民族架苓是聖樹，象徵子孫世代繁衍，或其樹葉变成平地人。因人多屋小，林任坤(T2) 後代大部份又分居在附近或島外，尤其是日本與美國，尤其是為學醫與行醫。(在劉德凱主演的電視劇“封神榜” 第17 與18集說皇叔丞相比干暴露討王寵妃妲己請來宮宴歌舞的“仙女”全是她的狐狸精成變的，導致其後全被殺，但也因此懷恨尋仇，裝心臟急病須吃玲瓏心(有七孔，異與常人的六孔)，她同謀進言天下只有比干有此心，在紂王逼迫下，比干在朝廷眾人前自己剖胸取出心臟，而後身亡。其女後為姬發(周武王)妻但不久与武王母同被殺於商討周之戰。武王乃以此為藉口討伐並滅掉有644年的商朝而開始867年的周朝。因此林姓開始也與醫事有關(7-孔心臟肉治急性心臟病)

因此，我覺得有趣也有義務記錄佳冬林家屬醫護業的经厂，其始祖因有特殊醫事得家姓“林”，三千年後其後代為醫業 因其過多這業的人數而造成大量各人因這業而移民。這事，雖發生在几十年裡，及他們對醫事醫學的貢獻，雖小，会永留在人類。蒙不少親友的幫助，我把直接簡接收集到的資料編排如下所述。

Introduction and abbreviation.

File : Appendix Y1. 佳冬 6th ed. 06-18-14

p. 3

This "Records" was written for the descendants of Lun-kun Lin of Jiadong Village, Jiadong Xian, Pingtung County, Taiwan. It is to be used as reference by them and the relatives who are included in the Summary. It was prepared and printed with private PC and printers. A lot of data were furnished relative3s and friends or obtained from public free websites. If there is improper, incorrect or incomplete ones, please forgive and tell the compiler so that it could be removed, corected, or added when a chance available.

In my childhood, I used to visit and even stay overnight at my father's western medicine (WM) and my grandfather's Chinese Medicine (CM; cared by his elder brother then) clinics, helpingto dispense powdered or liquid medicine (WM) or grinding herbs with feet on a metal wheel (CM) and enjoying their sweet medical syrup (WM) and sweet grass (CM) as a pharmacy was part of their medical practices. Now there and for a long time in the west, physician and pharmacist are separate professions. On the other hand, some of the major work of traditional WM doctors (WMDs) could legally be done by non-WMDs, such as nurse practitioners and anesthesiologists. Some graduates from medical school, often top ones, do research and teach in basic sciences such as microbiology which I worked for a while and my boss) and they never see patients to do diagnosis and treatment directly. Physicians' work is delegated to other healthcare professions. In the early 20th century, CM was at the brink of disappearance with the central government ceasing to issue licenses for CM doctor (CMD) around 1920-30. This 3,000-year old profession has been revitalized and is as important as WM. However, it requires more understanding and, by western standards, scientific basis (SB), including the well-known acupuncture. Perhaps it needs different approaches from WM for SB.

In my middle and high school years, I often worked as a pharmacist in my father's doctor pharmacy, to prepare medicine according to prescription, to wrap it into small bags and to collect fees. I even rearranged the pharmacy's furnitures twice, turning them 180 degree. A few days before the lunar new year, my father would give me a list for me to collect unpaid fees at many patient's homes, and we often got produces instead. In college and as a graduate student, I found the unique of medical education. My college veterinary medicine (VM) major courses are the same as those for medical students except hosts (various animal vs human) and more variations (e.g., for pathogens) but much less detail. In the college, a professor has to teach 2 or 3 courses by himself alone and labs is completely taken cared by a teaching assistant. In the medical school, the same course is taught by a group of teachers (5 to > 10) and the labs involve even more teachers to include TA and graduate students (part of training). As a graduatstudent of microbiology, I attended the medical microbiology course with sophomore medical students, as a prerequisite for most graduate courses. I was also in the same class with them in other medical subjects such as medical freshman biochemistry and histology and sophomore pathology. I had all these previously in collegen but the class room environemts and language (terminology) differed and the knowledge advanced rapidly since.The difference in environment could be partially due to class size with 200 medical vs my >20 VM students then.

As I grew up, with studies & work in basic med fields in 4 medical schools and with two sons as physician, as well as many relatives, friends and ballplay-partners in medical jobs, I learned that physicians are "no 9-to-5" professions, instead working 24 hours a day & 7 days a week, regardless of storm, on life-threatening & often hopeless tasks. My mom used to open the main front door of our 30-room house complex for my dad coming home from patient house calls. And there were always some patient's families at my dad's bed side before he woke up in the mornings. Medical education & training are difficult & long, as often shown in news media, especially TV.

With time & older, I learned some unique part of my Lin family history and the medical profession. In the early 1980's, my parent-in-law, a retired elementary school principal in Taiwan, visited my family in Miami, Florida. He gave me a 1981 newspaper Taiwan Daily with an article entitled "A perfect-tenfamily education ... produced 35 medical doctors in 30 years ", with their names listed and stating probably a record in Taiwan or even the world in terms of the number. This story was a few years later reported by a couple of TV stations in Taiwan, with more WMD names; and because of this, one Lin house became a historic site. Lin Qi-soo practiced Chinese medicine with a herb store, where I spent some happy hours in my childhood, & financially helped the medical education of Lin Chi-chung, his brother Lin Qi-jen and other relatives. The two brothers became the very first western medical doctors (WMD) of the Lin family in the small Jiadong farm village. They essentially started the "tradition" leading to "over-production of WMD" and caused another major migration of a branch (a very small one) again, out of Taiwan. This migration is unique in its process, cause and scope in the > 3000-year history of the Lin family and in the world, as it is for medical profession and it is further away in many places in a few decades. In view of the above various circumstances and events, I write this pamphlet to record the facts of a century contribution to healthcare professions by Jiadong's Lin family members. Their nuptial and maternal blood kins are included for their close relationships in their career choice, opportunity and tradition as well. The kinships within and without the Lin family are depicted in Charts attached.

The Lin family started more than 3,000 years ago, with a unique historic event which has been the subject of story telling, movies, TV series and dispute. Lin Jen, born 3.000 years ago in the Yi Zho of China, is the very first ancestor of Han Chinese' Lin families. His father Bi-gan, born in 1025 BC, was the uncle (& prime minister)of the last emperor of the 644-year Shang dynasty, but he was excuted at the royal court with chest opened to extract his heart after kneeling at the court for 3 days and 3 night trying to persuade the crude and immoral emperor to mend his way. Bi-gan 's wife hid and gave birth to a son who was later given the family name "Lin" by the founding emporer of the Zhou dynasty as he was born in the woods, which in Chinese is two trees and pronounced Lin. Wars and for a better life forced some of his descendants to move southward to live in Sandong, Fuken and then Canton. Lin Chiau-fun with his brother in the "White Horse Village of Mei-zhou further crossed the Taiwan Straight, stayed in Kan-tin, and finally settled in " the foot of bishopwood", a place named after the tree. It was originally settled by the aboriginal tribe "Pin-pu" & renamed Jiadong in 1922. Before then, four gates & walls were built to defend against invaders (e.g., Japanese soldiers in 1895). According to some aboriginal tribes, the tree is sacred and bestows prosperous descendants or its leaves becoming people in the plain. As the family grew too big with limited space, descendants of Lin Lun-kun (T2) scattered nearby or moved out of the island, especially Japan & USA and especially for medical study & practice.. (A recent TV video series showed that, to revenge Bi-gan's revealing all dancers she invited at a royal banquet were fairy fox, the king's favorite cocubine pretended to be very sick and her co-conspirator suggested to the king to use a piece of a 7-hole heart to cure. As strongly requested by the king, Bi-gan, the only person to have such heart, opened his chest & removed his own heart at the court for the cucubine and died. His daughter later married Chi-fa (Zhou Wuwan later) but died with Wuwan's mother in a suppression battle of Shang against Zhou, the latter tragedy became Wuwan's excuse to conquer the 644-year old Shang dynasty and to start his 867-year Zhuo dynasty in 1122 BC). So, the start of the Lin surname was related to medicine (to use the rare 7-hole heart to treat acute heart disease). The oyessey of the Lin family with one small branch as example in relation to world and Chinese histories is further summarizedin Appnedixes 1 & 2.

Thus, I felt interest and responsibility to record the experience of healthcare professions by Jiadong's Lin family, whose very first ancestor got the family name "Lin" because of the unique medical event and, 3000 years later, whose descendants migrated in mass but individually,further away , again because of medical professions. This event, although in a short time, and their accomplishments in medicine, although small, will remain in mankind's history. I therefore compiled this record below with the data obtained from relatives, friends and websites.

在日据45年殖民統治下很多台灣精英去當醫生。理由之一是台灣人在政府或公職上的限制。還是最先設置的高等及西方教育是醫學校，其畢業生不久有相當好的生活與社會上的尊敬。其中也在別的領域/才能有成就或社會貢獻。其一部份也記錄在此文，非醫務業家屬在這方面的成就也就同樣提起以顯示我們佳冬林家的博大貢獻。因本不在此本計劃內而沒有特意去收集，這方面的資料極少可供敘述。

在二次世界大戰前，佳冬村已有几家林姓家族，也由廣東搬來如 圖九所列。此小冊只包括林任坤後代，其三千年移動史以一小支為例簡述於附件一與二。

千百年來，中西對人命關天的醫師職業的養成一般都異於其他行業，或許沒有中國古時為考科舉制度下的進士的寒窗苦讀十年那麼辛苦，但也差不多，尤其是近50年或更久的時候起，尤其在歐美的先進國家，醫師的嚴格教育(6 - 8年與本科，在美國還有醫二後基礎醫學科及醫三或四後的臨床學科的全國性考試要通過)及更嚴格的訓練(至少3年，還要通過臨床經驗全國性考試)是更漫長的辛勞。又因自律及公私法規，每几年執照換新時必要有几十小時的“繼續學習”。而這些過程因自新及別行的新智識一直在改進與擴展。一般來說，醫本科是4年，是進入它之前的預科要求提高比較大，如下以**台大醫學系**及**古近中外醫學教育學制**的簡述。

醫學教育之演化—從台大醫學院歷史(1897 - ##)(縮寫在括弧內)為例:
1902-'29 (畢業年): 台灣總督府醫學校 (台灣醫學校)，收小學畢業生，一年預四年本科，沒學位。
22?-’30: 台灣總督府醫學專門學校 (台灣醫專)，收小學畢業生，4-5年預4年本科，給‘得業士’*#。
26?-’36: 台灣總督府台北醫專專門學校 (台北醫專)，收5年制中學畢業生，4年本科，有‘得業士’#
37-’45: 台北帝國大學附屬醫學專門部(北帝大醫專)，台北醫專的繼續#
40-’45: 台北帝國大學醫學部 (北帝大醫)，收‘高等學校’**畢業生，4年醫本科，‘醫學士’學位#
46-’50: 國立台灣大學(台大)附設醫學專修科(台大醫專)，北帝大醫專的繼續。
47-: 台大醫學院医科/系(台大醫)，收6年中學畢業生，2預&4年本科&1年實習，‘醫學士’學位***。
* 其畢業生(在校8-9年後)併入不久後新改名的台北医專。
** 日制‘高等學校’是5年制中學畢業生進去念，相當於大學預科，得‘得業士’學位。
***先由五年(五屆)變六年制(三屆)後才七年制。之後同時有美式的“學士後醫科”(三屆)。
為鼓勵來台，日本政府給報考這些醫學院的日本人加分。因此 家父 (P14) 及邱西蕃父親邱仕榮(N23) 班上日本人比較多: 42/70 (60%) 在1931及22/36 (61%)在1944班。
頭兩年是台北病院附屬的“土人醫師養成所”

醫學及有關的教育學制：

- A, 未經大學或更高的專業教育的中醫師的中醫診所/葯房私授
- B, 由小學畢業或相當程度後五年以上西醫學校畢業。醫學校升格為醫學專門學校後，有些畢業生去進修(几堂課，後來)取得後者的學歷‘得業士’或學士(年在括弧內)如‘C’ 下述。
- C, 由高級中學畢業後升四或五年醫學校，取得‘得業士’學位，可能再加一年以上實習。
- Cx, 中學畢業後之專科(三年得副學士)或大學(4-5年得‘學士’，已括約學士及戰醫學士。)
- D, (歐式醫師教育?) 由高級中學畢業上至少六年西醫學院校，取得‘醫學士’，(包括世界二戰前日本帝國大學醫學部高中畢業後要先進二到三年的‘高等學校’(相當於醫預科或先修班)) 再經几年的實習及住院醫師醫院臨床訓練。南美如巴西國也如此。
- E. (美式醫學教育, 9-13 年) 大學畢業，一般有學士學位後，也考過全國性的‘醫校資格試’才進入四年醫學院校，得醫學士，之後還要3到5年的醫院實習與住院醫師臨床訓練
- E1, 如上E, 但全班由大學(2-3年)直升4年醫學院，得學士與醫學士兩學位 (省1-2年)
- E2, 如E1, 但只少數(<20,特優生) 在E 班(>120人)裡
- S, 在美國給外國來的專業如牙醫師及葯劑師特設的1到3年教育，幫助取得執照資格及考試
- G, 授與碩士與博士的大學或獨立研究院所

醫學士及早期的醫學‘得業士’ 是相當於北美(美國與加拿大)的M.D. (Doctor of Medicine)學位，一般都經過醫學院校念四年醫學本科畢業時取得，是當醫師的最基本職業學位。醫學博士(日本及台灣,其他國家的Doctor of Medical Science，歐洲的MD)是相當於Ph.D. 的研究生學位 (research doctorate), 要几年的有關醫學的研究工作，有論文或著作及專家羣口試通過後取得。因此，把‘醫學士’翻譯為MD，再由這MD翻譯成‘醫學博士’是不對的，就如 中國人= 亞洲人= 日本人。

翻譯与(縮寫若用到) Translation & (abbreviation if used).

親屬關係 Kinship: 曾祖父/母 great-grandfather/mother (GGF/M); 祖父/母 grandfather/mother (GrF/M); 父/母father/mother (Ft/Mt); 夫/妻 husband/wife (Hb/Wf); 兄弟 brother / sister (Br/ Sst); 子女 son/daughter (Sn/Dt); 孫子/女grand son/daughter (GrS/GrD); 曾孫子/女 Great-grand son/daughter (GGS/GGD); 伯叔父/母 与姑父/母 paternal uncle/aunt (PU/PA); 舅父/母与姨父/母maternal uncle/aunt (MU/MA); 堂兄弟/姊妹 first cousin, same last name (s1C); 表兄弟姊妹first cousin, different last name (d1C)(見圖七有關其他母系血親稱呼: See Chart 7 for maternal blood kins); 侄兒/女与外甥/女(nephew/niece (Np/Nc); 岳父/母 father/mother-in law (FiL/MiL); 兄嫂/弟姊妹夫 sister/brother-in-law (SiL/BiL); 妻之兄弟(大小舅子)/姊妹(嫂) Wife's brother/sister (WiB/WiS); 夫之兄弟(大伯,小叔)/姊妹(大姑,小姑) husband's brother/sister (HiB/HiS); 女婿/兒媳 daughter / son-in-law (DiL / SiL); "親上加親" multiple kinship (Mtpl kins).

人名 Person's name: 除非已被本人用, 英文名是最短拼音, 有不妥或不對請告訴我以便修正.

地名 Place: 台灣 Taiwan (Tw; T); 中国 China (CN; C); 美国 (USA; U); 日本 Japan (Jp; J); 澳洲Australia (Asr; A); 紐西蘭New Zealand NZ; Z); 加拿大 Canada (Cnd); 新加坡Singapore (Sgp; S); 德国Germany (Gmy; G); 巴西 (Brazil; Bz; B);

台北Taipei (Tp/TP); 高雄Kaohsiung (Ks); 屏東 Ping-tung (Pt); 佳冬 Chia-tung or Jiadong (Ct/Jd); 萬建村Wan-chien Village (Wc); 紐約州市 New York State/City (NYS/C); 美国加州 California (CA);

台灣總督府 (日本) Taiwan Governor-General of Japan (TGG); 縣 County (Cot); 市 City (Cit); 鄉 xian (Xi); 鎮 town (Zn); 村 village (Vi);

機構 office/organization: 大學 university (U); 学院 college (C); 專科学院 junior/community college (JC); 小学elementary school (ES); 中学middle school (MS); 高中 high school (HS); 高等学校pre-college high school (pcHS); 高級職業學校Vocational high school (VHS);

公司 corporation (Co); 研究所 research institute (RIst); 實驗室 laboratory (lab or Lab); 醫學院校 medical college/school (MC/MS); 醫院 hospital (H); 中心 center (Ctr); 呈

職位/稱 position & title: 校長或總裁 president (Pr); 副校長/副總裁 vice-president (VP); 院長 dean (Dn) or director (Dtr); 主任 chairman (Chr), head (Hd) or chief (Ch);

名譽教授 professor emeritus (Prof Em or PE); 正教授 (教授) professor (Prof; F1); 副教授 associate professor (Assoc Prof; F2); 助理教授 assistant professor (Assist Prof, F3); 講師 instructor (Instr; F4); 教員 lecturer (Lec); 助教 Teaching assistant (TA; F5); 訪問教授 visiting professor (VsP; FV); 博士後研究員 post-doctoral fellow (PDF); 研究員 research fellow (RF); 研究助理 research associate (RS); 研究助手 research assistant (RA); 實驗室技術員/助手 laboratory assistant / technician (LaS / LaT); 技師 technologist (TcG);註冊護理師 registered nurse (RN); 護理師 (大專專業) nurse (Ns); 護士(高中職校畢業), junior nurse (JrN); 臨床 clinical, cl; 兼任 adjunct (adj); 總或一般 general (gnl); 醫學或醫務medicine or medical M or med); 兼任 part time (P-T); 董事長chairman Of board (CB).

It has been said that, during the 45-year Japanese colonial rule period, top Taiwanese chose to be medical doctors. One of the reasons is the limit for them in governmental or civil services . Another was that the first high standard or western education here was the medical school and its graduates soon had high standard of living and respect in society. Some of these doctors have talents, achievements and/or contribution to the community/society other than medical practices. A few of these will be cited, along with those accomplished by non-medical relatives to show the various contribution of our family form Jaidon village. As these are not in the original project plan and their data have not been sought in particular, only a very few cases are available and could be presented.

There were other Lins families in the Jiadong village before WW2, also from the same same county in Canton, China, as listed in the Flow Chart 9. This booklet deals with only the descendants of Lin Lun-kun, whose migration from China to Taiwan and beyond in 3000 years is briefed with a brach as example in Appendixes 1 and 2.

For hundred/thousand of years, training to be a physician has been different from other professions. It may not be as difficult as the well-known 'ten years of studies in cold house' , but very close. In the last 5 decades or more, the physician-qualifying education, especially in Europe and USA, has become hard and long (6 - 8 years) In the USA, it includes the national exams for medical basic science after sophomore and clinical courses after junior or senior; it is even harder in its required internship /residency clinical training (at least 3 years) and to pass the national exam for clinical skills. In clinical practice, continued education is required for the license renewal every few years. Furthermore, these are being improved and expanded by its own and others' fields. In general, the medical education itself is a 4-year program.

It is the pre-medical requirement increased more, as briefly noted below with the history of National Taiwan University (**Taita**) Medical School as an example and the medical education system in the world and in the old days and now.

The evolution of medical education as seen with the history of **Taita** medical school which opened in 1897 for the first class## (abbreviation in parenthesis).
02-'29 (grad. y.): Taiwan Governor-General Medical School (**TGG-MS**), elementary school graduates (ESG) as entrants, 1-y pre-med & 4-y med. No academic degree.
28?-’30: TGG-Medical College (**TGG-MC**), ESG as entrants, 4-5-y premed & 4-y med, became graduate of Tp-MC (below), gave 'associate' degree*
26?-’36: TGG Taipei Medical College (**TGG-TpMC**), 5-y middle school graduate as entrants, 4-y med for the 'associate' degree.
37-’45: Imperial Taipei University Medical-specialty School (**ITP-MSS**), continuation of TGG-TpMC).
'40-'45: Imperial Taipei Medical School (**ITP-MS**), 2- or 3-y 'senior high' **graduate entrant, 4-y med , 'Bachelor of Medicine' (BM; MD equivalent) degree.
'46-'50: National Taiwan University (NTU, Taita) Medical Specialty School (**Taita MSS**). Same as ITP-MSS.
'47-now: Taita Medical School (**Taita-MC**), 6-year middle school graduate entrant, 2-y premed 4-y med & 1-y internship, for 'BM'(=MD) degree***.
* Graduates (after 8-9 years at the school) became part of the succeeding TGG-MS).
** Entrants for the Japanese 'senior high' were 5-year middle school graduates with 'associate' degree. and equivalent to pre-med programs.
*** Started with 5- (5 classes) and then 6-year (3 classes) programs before the 7-year system. The"post-bachelor" medical education co-existed for 3 years.
To encourage Japanese to Taiwan, Japanese were given bonus point for the entrance examination for these college-level medical school. Thus there were more more Japanese in my dad's (P14) and Chiu Hsi-chiang's dad (N23) classes: 42/70 (60 %) in 1931 and 22/36 (61 %) in 1945 classes respectively.
It started as "the aboriginal physician training school" of the Taipei Hospital for 2 years.

Medical education system:

- A, Private apprentice at Chinese medicine clinics / herb pharmacy, without college-level or higher professional education.
- B, Western medical doctor (WMD) graduated from ≥5-year medical school after elementary school or equivalent. After the medical school became college level, some students re-educated (a few lectures later years) there to obtain BM=MD degree (year in parenthesis).
- C, WMD graduated from 4 to 5-year college level medical education after high school, with a degree (BM=MD) equivalent and 1 year of job training.
- Cx, Post-high school junior college (3 yrs, associate degree) or colleges (4-5 yrs, bachelor degree, including Dr. Pharmacy & DVM).
- D, (European med ed.) WMD graduated from > 6-year college level medical education after high school, with a Bachelor of Medicine degree (BM = MD), including those requiring additional 2-3-year 'higher school' after 4-5-year high school (equivalent to pre-med in USA) for 4-year medical education in pre-WW2 Japan Imperial University Medical Colleges, & additional years of internship and residency clinical training in hospitals. Also in Brazil.
- E, (USA system). WMD graduated from 4-year medical school after college graduation (most with bachelor degree), with MD degree, and then 3-5 years of hospital intern/residency clinical training.
- E1, Same as E, but the entire class continues from undergraduate (2 or 3 year) to 4-year medical school, with both bachelor & MD degrees, saving 1-2 years.
- E2, As E1 except only a small number (< 20, honor program) among >120 students in the regular 4-year medical school (>120 students);
- S, Educations (1-3 years) for foreign professionals such as dentist & pharmacist for qualification for license exams in US.
- G, Graduate school or institute for master, Ph.D. And equivalent degrees

MD stands for all basic medical degrees obtained after a 4-year medical education for professional license & practice. It is the 'entry level first professional degree for the practice of medicine' & equivalent to the Doctor of Medicine (M.D.; MD) in the USA & Canada, which generally require 4 years of college education for a bachelor degree & 4 years of medical school. It is not a research doctorate degree such as Ph.D., not the MD (M.D.) in Europe & not the Doctor of Medical Science (as in Japan) as these are awarded after a few years of medical research with original research thesis / publications & peer group oral examinations. Therefore, North American MD and 'translated MD' are not ' Doctor of Medical Science' and not European MD; a professional rather than academic degree.

学位 academic degree: 名譽博士 honorary doctor (HDr); 博士(研究博士) doctor of philosophy (Ph.D. or PhD); 醫學博士 doctor of medical science (Dr M S) or European doctor of medicine (Er MD); 科学博士 doctor of science (DrS); 碩士 Master degree (MS); 教育博士Doctor of Education (EdD); 药学士 Bachelor or Doctor of Pharmacy (BS(pharm));学士 bachelor (BS or BA); 醫學士 North American doctor of medicine (M.D. or MD); 獸醫學士 North American doctor of veterinary medicine (DVM); 得業士 = 副学士 associate degree (畢業或結業証書 diploma (Dpm.). 因資料來自親友或公共文獻如網絡 或非當事人个人原因(如中山醫大头十年), 有些畢業生的学位不清楚或有錯誤, 請多包涵, 並請當事人告知改正.(中山醫大醫學系第十屆(1977)以前畢業生"無学士学位"(見GB19), 因他們是念了大学四或五年, 作者用 "學士(醫學)"別於"醫學士", 有一位親戚校友1975畢業的在美國行醫, 他的履厂表寫中山醫大1975 diploma 及1988 MD, 後者是他 行醫几年後回校念两年取得的, 像半世紀前台灣醫學校畢業生回校補課拿台北醫專的"得業士"学位), 其他親戚校友沒有明确告訴我他們的中山醫大畢業是何学位)). Some acedemic degree might be wrong due to the data from relatives, friends or websites or college's problems (such as the first tens of CSMC). The graduates of first ten classes (before 1977) of the Ching-San Med U (CSMU) were not given any academic degree. As they all have studied for 4 or 5 years there, "BS (med sci)" will be used for them. One graduate among Lin family member lists " 1975 Diploma" and "1988 MD" in his CV, the latter apparently he received after 2-year studies after a few yaqrs of medical practice (Thing similar to that graduates of TGG-MS got the AS degree of TGG-MC 50 years ago). None of its other graduates whom I asked told me the medical degree they have.

台灣地區醫學大学院校(縮寫) University (U) / college (C) with medical school in Taiwan (Tw)(abbreviation): 国立台灣大学 (台大, 其他縮寫見上述'台大醫學院厂史'), National Taiwan University (NTU, Taita; see more abbreviations in the history of Taita medical school above); 国立成功大学 (成大), National Cheng-kung U (CKU); 天主教輔仁大學 (輔大), Fu-jen U (FJU);国立陽明大学(陽明大), National Yang-ming U (YMU); 長庚大学 (長庚大), Chang-gung U (CGU); 台北醫學大学 (北医大), Taipei Medical U (TpMU); 高雄醫學大学(高医大), Kaohsiung Medical U (KsMU); 中国醫葯大學 (中醫药大), China Medical University (CMPU); 慈濟大学 (慈大), Tzu-chi U (TCU); 中山醫學大学 (中山医大), Chung-shan Medical U (CSMU); 馬階醫學院 , MacKay Medical C (MMC); 台湾国立清华大学 Tw Tsinghua U (ThU); 台灣國防醫學院 National Defence Medical College (Natl Def Med Ctr; NDMC); 可能省略"國立", May omit "National". 有些大学以前是同名学院 Some universities were previously same-name colleges.

其他 Other: F, 大学教員 faculty; P, 有論文或著作 簡述於第六章 with selected publications titles in Chapter 6; W, 職業/服務獎, with distinguished professional award; 出生年?, 由年令或其他資料推測, birth year ? estimated from age or other data.

個人資料

因社会上的認識, 職業性質, 養成教育及它們厂史演变之不同, 有閩親戚按血緣先分爲四大組(I - IV), 或再以 職業各分小組, 以 世代/年令 及親屬關係順序給編號碼以便引述. **表一**先列分組之成員編號碼, 血緣及教育/工作地國家 (單英字縮寫見上文). 第五大組是在醫葯護本行內及外有特別成就的, 它們或多或少与本文包括的有閩連, 如攝行政的衛生局長, 食物生產或行銷的領導, 寫有閩醫葯護人員,病人及故事的作家, 促進養生健康的職業, 等等. 這五大組又以英文字母分別. P來自 paternal (父系); M, maternal(母系); N, nuptial (姻親); H, healthcare (保健); 及S, special (特殊). 编号只有一大字母 P, M 及N在數字前的 代表醫師,其後有字母小 s是指其配偶(spouse), d 是牙醫師(dentist), 小p是与醫學有關的博士或教員, 再其後(第三字母) 大P是醫師及小d是牙醫師. 同行配偶緊跟後. 在N組中, 同族又用英文小字母順序在一起以便參考.

第一章. 醫師, 牙醫師及有閩博士或大專教師: 男性後代及其配偶 (P 組)

跋与感謝

念初中時, 家父把診所与药局由佳冬村市區搬到更鄉下的萬建村住家繼續開業. 這之前他是一般是半夜回家過夜, 還常在診所二樓日式大床與兩三位一起過夜(有時我也參加). 晚飯是药局生帶過去吃, 我們小孩子, 包括叔叔的, 都是祖父母帶頭帶大的, 在家人多, 三頓飯時兩三張桌子很擠, 常是小孩子先吃完走後大人補上, 蔬菜母親們種的, 魚肉則多半祖母從來家販賣商賈或祖父從家父的药局工作完回家時在佳冬村市區買回來. 祖父常要我們寫毛筆字或拔草, 以賞錢為餌, 除此之外, 祖父好像是不会做事的一大閒人, 尤其是初中時與堂弟林祖相在他臥房半樓看到一木箱裡有不少線裝文武俠小說如"七俠五義", "彭(施)公案" 等. 我們偷偷的拿出來看, 也不知他老人家知不知道. 當時我家中文讀物很少, 之前, 我讀過過的中文小說是借來的不全的日文的"西遊記", "水滸傳", "三國演義", "封神榜", "亂世佳人(日譯本)" 等. 我對他老人家的誤覺更深. 反觀同住的(不同厨房)他哥哥在中药房及家大忙(如觀賞用的小魚池及小魚、大厝的雜事等), 像能人多勞. 我這對祖父的錯覺要到他去世二十几年後才消除. 1976 我由美國東南角落的邁亞密去西岸的落山雞附近迪士尼樂園的安尼海市參加一週的学会的大年會後回台省親, 在老家家父親口告訴我不少我以前不知道的家事及鄉村裡的事, 有些好像是上一代的恩怨雜事不應連累下一代. 不少我現在 記憶猶新, 尤其是有關我祖父的, 更是給我當頭一棒的特大"故事" 如下述. 我祖父是四兄弟中最聰明的, 因此 他當中醫的父親及未來岳父羅金祥(前清秀才/舉人, 中醫師, 佳冬鄉前身茄苳腳區首任區長), 特別用心教他當中醫師, 台灣醫学校成立不久, 報考的人太少, 也由地方政府推薦, 他(我祖父)也在其中, 為某種原因(已婚, 不信任西醫

Epilogue and Acknowledgement

My father moved his clinic and pharmacy home in the Wan-chien Village from the commerce section in the Jiadong Village when I was in junior high. Before then, he usually came home midnight, often staying overnight on the Japanese-style bed in the 2nd floor above the clinic with a couple of pharmacy assistants (I occasionally joined them). The assistants brought dinner from home to him. His and my uncles' kids were taken cared of by our moms with my grandfather as the family head. With so many people, meals were always eaten first by kids at 3 crowded tables. Vegetables were from gardens taken cared by my mother and aunts. Meat and fish were bought by my grandmother from vendors coming to our home or by my grandpa at the Jiadong village market on his way home from work at my father's pharmacy. At home, my grandpa often persuaded us to practice the Chinese writing with brush or to pull weeds, with cash rewards. Aside from these, he seems an idler or a person who could not do anything else. My such feeling was furthered by an event. I & my cousin Tsu-xian found many string-bound Chinese novels in a wooden box on the ceiling of his study room, e.g. "Seven Knight & Five Brethren", "Cases by Judge Pun (Soo)", etc. We were extremely excited and took them out to read without his knowing. We had few Chinese books to read then. Those I read before were borrowed incomplete Chinese classic novels "the Momkey King", "Waterfront Bandits", "Story of Three Kingdoms" and "Gone with the Wind", all in Japanese and several volumes. In contrast, his elder brother who also lived in the same house was always busy at his Chinese medicine clinic and store and at home with his ornament fish pond (we kids played there too) or house affairs. This misunderstanding on my grandfather persisted for another 20 years or so after he had passed away. In 1976, I visited the old home after attending a week-long FASEB annual convention near the Disneyland in California. There at home and then my father told me for the first time a lot of stories about our families and villages. Some involved good or bad events of previous but should not be so for the subsequent generations. I still remember clearly many of these old stories. The one of my grandfather was especially the biggest one striking me hard then, as briefed below. It turns out that my grandfather was the smartest among 4 brothers and as such both his father and father-in-law (a scholar and the very first town mayor of Jiadong) taught him more enthusiastically the Chinese medicine than anybody including his elder brother Lin Qi-soo and cousin (in-law's son). Soon after the medical school (TGG-MS) established, the government drafted /or recommended youngsters for its entrants. My grandfather was on the list, but hid from government agents for certain reasons (married, distrust western medicine or Japanese). After a while, his much younger cousin Lin Chi-chung took his place for the draft and became the very 1st

或日本人），他被藏起來躲避官差，後來林其忠代他的「征召」，開始了佳冬林家的醫師世家。我祖父与他哥哥林其樹繼續他們父親的中醫藥房二十年後他個人 改到我家診所的西約局全天候忙（林其樹的獨子只有中學畢業也在那裡學當中醫），在我知道這故事之前，1960我在台大工作時，我經由葉明宏（台大電機系學生，同村）認識在台北泉洲鄉當西醫幾十年後退休的林其忠（葉的姑公），之後去拜訪過幾次，每次他好像有說不完的，要我留宿，我沒有答應過一次，他給我看了他在台灣醫學校的全班照（還指認高認創校的杜校長為同班）及開業不久獨自遊大陸訪廣東老家之後在北京萬壽山他自己一人的大照片（胆子蠻大，當時大陸並不平靜，常提起我祖父很掛念的樣子）（年令差5、6歲，只是玩伴的可能性不大），還說，他本來在佳冬村開業，後來讓給了家父，並盡力幫家父。他自己則離鄉背井到別地行醫。几年前台大碩士論文（文獻GA13）提到林其樹的中醫藥房「資助兄弟（林）其忠，其言謙等在台灣醫學校畢業…」，我想當時我祖父林其堯也在那藥房共事參與資助，不然林其忠幾十年後還掛念他，林其謙在幾十年後還由屏東回到鄉下的萬蓮村（家的三邊多是稻田）探視臥病的我祖父，也許他（我祖父）才是佳冬林家西醫世家的促成者。很久以來我一直想表達我糾正早年對我祖父的錯覺，這本佳冬家西醫概略也許是知不知覺下為此而寫的

部份早期草稿有分批給當事人看過與修改增補，最後的第六稿完全是寄給一直供給很重要或很多資料九位(楊敏文、林祖恩、楊光妹、林敏剛、歐西蕃、林祖權、林祖道、林祖安與林豪明)慢慢複查，修正與增補。序言與這跋與感謝部份或全部的英文句子與文字也經由美國出生長大的小女兒雅美(律師)及週末網球球友比魯美國人Denise志願的複查與修正。但還是免不了有少可或要改進的地方，還有很可能又弄錯或遺漏，請多告訴我，也許一年內能列出這些修正與增補寄給各位。

最後，我要感謝親友們的支持、鼓勵與寄來資料。除了以前很多人早就知道及媒體報導過的佳冬林家後代(西醫師支圖一A及一B)之外，林祖道兄幾次在佳冬寫寄航空信由我在台北的二哥林祖安電郵給我修改及補充(資料GA1及GA2)。不認識的鄉親楊慶照在來鄉自動電郵來50多件的資料，並印出我的部份草稿及詢求資料的電郵送給親友。祖權堂兄在這編排一開始就我意想不到的用航空包寄來六本大書(「陸客家史…」，「…佳冬林氏族譜」，台大「景福校友通訊錄」及「台大醫學院百年歷史(上、中、下)」及解答我的難題的長信(GA7, GA8, GB8, GB10, 及GB12)。林祖恩電郵來的「廣東蕉嶺渡台林氏族譜」(GA21)及特別去佳冬村蕭家拍照的蕭家族表(GA7及18)。楊慶照及楊敏文電郵來的佳冬林家資料及玉光楊與吳家族譜(GA10、12、14及15)，及徐和志航空寄來的「徐家近代史考」(GA19)，三十多年前舍弟林祖淑寄來林尋香於1968著的佳冬林家族譜(GA11)。參考這些多遍以使資料真確與更完整。我也不能沒有熱心的親友的信來如楊敏文(M14)的(>258件)，楊光妹(M11 楊慶榮的夫人)的(>228件)，邱西蕃(PsP1)的(>65件)，林祖恩的(>57件)，楊慶照的(>49件)，林梅蘭(S6)的(>46件，並重新再航空信寄來她的發表在台灣의日報上的短文及一冊文集，列於第六章56)，林祖安的(>39件)，曾淑芬(M3)的(16件並按裝及教我使用蒙台拿集能讓我電腦看中文)，洪國治(朋友)的(>18件)，林秀月(P45)的(>17件)，楊惠英的(>12件)，林蘭貞(M陳瑞珮的母親)的(>8件)，張科(M31)的(>8件)，徐和志(N33a)的(>8件)，陳淳迪(Nd6)的(>8件)，林義凱(P49)的(>7件)，林愛美(Pd6)的(>7件)，Teresa 廖的(>5件，還有航空信)，林德烈(S)的(>5件)，林秀蓮(H20)的(>5件)，林秀惠(P38)的(>3件)及其他列在第七章參考資料的。不少電郵附有十頁的履歷書及相片。

western medicine physician in the Jiadong Lin family. My grandfather continued his Chinese medicine practice with his elder brother Lin Qi-soo for about two decades until he worked full-time at the pharmacy attachment of my father's western medicine. Qi-soo's only son with high school education was working and learning with him then. Fifteen years earlier, in 1961-62 I saw Lin Chi-chung for the first time through a friend Mr. Yeh (Chi-chung's first wife's great nephew) at his home in the Lu-chow Town of old Taipei County and then many times since. He told me a lot of things, especially those regarding my grandfather and father, even invited me to stay overnight. He showed me his medical school class photos with the famous Dr. Tu (Kaohsiung Medical University's founder and first dean) and his large photo (8.5x11") taken at the Coal Mountain in the old imperial Palace in Pejin during his solo trip to the China mainland in his early 20s, which included his visit at the old Lin family home in the Canton Province (a brave trip as it was not peace time there then). He told me a couple of times that he let my father have his old clinics and attached pharmacy and helped my father in medical practice and he himself then moved to other places to continue medical practice. He mentioned and appeared to be very thoughtful of my grandfather (their 6-year age difference rules out being childhood playmates). A Taits MS degree thesis (Ref. GA13) mentioned that "Lin Qi-soo had a Chinese medicine store and financially helped the medical education of (Lin) Chi-chung and Qi-jen brothers, ..." who led the Jiadong's Lin family to have over 50 western physicians. As his brother & better trained, my grandfather must be involved in this activity and should also be credited, as suggested from Chi-chung's thoughtful memory of him a few decades later. Lin Qi-jen went from his busy clinic in the Pint-tung City to see my bed-ridden grandpa at home which is very isolated and surrounded on more than 3 sides by wet rice fields, a few decades after he had practiced medicine in a far away city. Perhaps, my grandfather was the one who promoted the Jiado's Lin family to become an "old and honorable family of physicians". Regardless, I have been for many years trying to correct my misunderstanding in earlier years on my grandfather. This could be my subconscious desire to write this booklet to apologize to him for so long.

Most data have been previously reviewed by the persons involved or their close relatives. The whole last (6th) draft was sent for final review to nine relatives who have furnished very important and/or large quantity of data (Minwen Yang, Tsu-en Lin, Grace Young, Mei-lan Lin, Hsi-chiang Lin, Tsu-chen Lin, Tsu-tao Lin, Tsu-an Lin and Homin Lim), and for correction and addition. The English idioms and spellings in the Introduction and Epilogue & Acknowledgement had also been reviewed and corrected by my USA-born and -raised daughter Margaret Amy Lin (a lawyer) and voluntarily by a weekend tennis friend Peruvian American Denise Leggett. It will still have room for improvement. I may also make typo errors in further processings. Please let me know of them and improvement to be made, so that perhaps I could list and send you the corrections and addition in a year.

Finally, I would like to thank relatives and friends for their support, encouragement and furnishing data. In addition to his original well-known and media-reported lists of medical doctors in the Jiadong's Lin family (Charts 1A & 1B), Lin Tsu-tao (last name first) in the Jiadong Village promptly responded to my drafts with new data and corrections, which were air-mailed to my brother Lin Tsu-an in Taipei who then forwarded it to me by e-mail (Refs. GA1 & 2). Ching-chao whom I did not know before voluntarily not only sent me 50 e-mails, but also printed out and hand-delivered my mails and drafts to those who do not use e-mail. My first cousin Lin Tsu-sen sent me without my request and beyond my expectation a large air-mail package with six books: on 6-Hakanes towns, Jiadong's Lin genealogy, Taita medical college alumni address, and 3-volume history of Taita medical college (Ref. GA7, GA8, GB8, GB10) and a detailed letter answering my questions regarding medical education, degree and terms in Taiwan. Lin Tsu-en e-mailed me the book "Genealogy of Jioulin's Lin families who crossed the Taiwan Strait to Taiwan" (GA21) and a genealogy table of Jiadong's Hsiao family (GA18) for which he made a special trip to photograph at the Hsiao's historic house. Yang Qin-chao and Yang Minwen e-mailed me portions of genealogy books of Jiadong's Lin, Yu-kuang's Yang and Wu families (GA10, 12, 14 and 15). Hsu Ho-chu air-mailed me a complete book "Historical studies of Hsu's family in modern era" (GA19). In the 1980s my younger brother Lin Tsu-chiu sent me a photocopy of a genealogy book of Jiadong's Lin family, which was written by Lin Go-xian in 1968 (GA11). I read many times and used these books and pages to make sure the data I compiled are as complete as possible and correct. Equally important and indispensable are hundreds of e-mails and some air-mails from relatives and friends such as Yang Minwen (M14) (more than 258 e-mails), Yang Grace (M11 Yang Chingtai's wife) (>228), Chiu Hsi-chiang (Psp1) (>65), Lin Tsu-en (>57), Yang Ching-chao (Chingtai's brother) (>49), Lin Mei-lan (>46; also an article on his father published in a newspaper in Taiwan and a collection of short stories she wrote and listed in Chapter 6, both 2nd air mailing as the first one was lost in the mail), Lin Tsu-an (>39), Tseng Su-feng (M3) (>16; she also installed the "Penpower Handwriter" and taught me to use it to enter Chinese letters into computer), Hong Kuo-chih (friend) (>18), Lin Shiu-yueh (P45) (>17), Yang Whei-yin (H26) (>12), Lin Lan-zu (>8), Chang Ko (M31) (>8), Hsu-Hochi (N33a) (>8), Lin Frank (P49) (>7), Lin Amy (Pd6) (>7), Chen Hun-tee (Hd6) (>8), Teresa Liao (>5, and a couple of air-mails), Lin Te-lieh (>5), Lin Henry Xiu-xiun (H20) (>5), Lin Show-weh (P38) (>3), and more as listed in the Chapter 7 Reference, many with multi-page CV and photos.

跋与感谢

念初中時，家父把診所与药局由佳冬村市區搬回更鄉下的萬建村住家繼續開業。這之前他一般是半夜回家過夜，還常在診所二樓日式大床與兩三位一起過夜(有時我也參加)。晚飯是药局生帶過去吃，我們小孩子，包括叔叔的，都是祖父母帶頭帶大的，在家人多，三頓飯時兩三張桌子很擠，常是小孩子先吃完走後大人補上，蔬菜母親們種的，魚肉則多半祖母從來家販賣商買或祖父從家父的药局工作完回家時在佳冬村市區買回來。祖父常要我們寫毛筆字或拔草，以賞錢為餌，除此之外，祖父好像是不會做事的一大閒人，尤其是初中時與堂弟林祖相在他臥房半樓看到一木箱裡有不少線裝文武俠小說如“七俠五義”，“彭(施)公案”等。我們偷偷的拿出來看，也不知他老人家知不知道。當時我家中文讀物很少，之前，我讀過過的中文字小說是借來的不全的日文的“西遊記”，“水滸傳”，“三國演義”，“封神榜”，“亂世佳人(日譯本)”等。我對他老人家的誤覺更深。反觀同住的(不同厨房)他哥哥在中药房及家大忙(如觀賞用的小魚池及小魚、大厝的雜事等)，像能人多勞。我這對祖父的錯覺要到他去世二十幾年後才消除。1976 我由美國東南角落的邁亞密去西岸的落山雞附近迪士泥樂園的安尼海市參加一週的学会的大年會後回台省親，在老家家父親口告訴我不少我以前不知道的家事及鄉村裡的事，有些好像是上一代的恩怨雜事不應連累下一代。不少我現在記憶猶新，尤其是有關我祖父的，更是給我當頭一棒的特大“故事”如下述。我祖父是四兄弟中最聰明的，因此他當中醫的父親及未來岳父羅金祥(前清秀才/舉人，中醫師，佳冬鄉前身茄苳腳區首任區長)，特別用心教他當中醫師，台灣醫學校成立不久，報考的人太少，也由於地方政府推薦，他(我祖父)也在其中，為某種原因(已婚，不信任西醫或日本人)，他被藏起來躲避官差，後來林其忠代他的“征召”，開始了佳冬林家的醫師世家。我祖父与他哥哥林其樹繼續他們父親的中醫药房二十幾年後他個人改到家父診所的西药局全天幫忙(林其樹的獨子只有中學畢業也在那裡學當中醫)，在我知道這故事之前，1960我在台大工作時，我經由葉明宏(台大電機系學生，同村)認識在台北景滄州鄉當西醫几十年後退休的林其忠(葉的姑公)，之後去拜訪過几次，每次他好像有說不完的，要我留宿，我沒有答應過一次，他給我看了他在台灣醫學校的全班照(還指認高醫創校的杜長良為同班)及開業不久獨自遊大陸訪廣東老家之後在北京萬壽山他自己已一人的一大照片(胆子蠻大，當時大陸並不平靜)，常提起我祖父(很掛念的樣子)(年令差5，6歲，只是玩件的可能性不大)，還說，他本來在佳冬村開業，後來讓給了家父，並盡力幫家父。他自己倒離鄉背井到別地行醫。几年前在一台大碩士論文(文獻GA13)提到林其樹的中醫药房“資助兄弟(林)其忠，其言謙等在台灣醫學校畢業…”，我想當時我祖父林其堯也在那药房共事參與資助，不然林其忠几十年後還掛念他，林其謙在几十年後還由屏東市到很鄉下的萬建村(家的三多是稻田)探視臥病的我祖父。也許他(我祖父)才是佳冬林家西醫世家的促成者。很久以來我一直想表達我糾正早年對我祖父的錯覺，這本佳冬林家醫業概略也許是不知不覺下為此而寫的

如參考文獻所列，不少資料是當事者慷慨以電郵信，填的表(電郵寄)，特別寫或已有的部份或全部(有的几十頁，也都電郵寄)寄來的，有些這些，尤其是林姓及別姓族譜，是本不認識的同鄉(有遠親關係)如楊慶照自供給，他還自動自願替我印出文件跑腿送給沒有用電郵的親戚，這些幫助太多，很難在此一一列出並致謝意，參考文獻也可能有遺漏，希望親友多包涵。有些資料是從網絡上免費得到的，有可能不正確或找錯人。比如有一對同姓同名同醫校畢業(差一屆)更在同市開業，有一羣一共十位同姓同名在台灣衛生署現職醫務人員名單裡，其中八人在台灣行醫，我要找的是在美國(第十一个)，還有一位在網絡上的履厂表上有列出不少論文題目，我高興得馬上亂點十題抄到草稿上(他兄弟兩人一直不回我給他們及他父母的很多信)，快完時才發覺不對勁，都是基礎醫學全撤，與他執業的外科不相關(他搞外科我也是由網絡上知道的)，我只好很失望的放弃了。說到此，還有好几位親戚就是死不給我一點資料，我用航空信与長途/國際電話也感動不了他們。我又不肯花錢用要錢的網絡，只好空白他們的資料框了，假如我還在工作，有一大堆這些網絡可用，尤其我是搞研發的，一定会少了不少空白框。有些資料，尤其是工作厂史，很難以偏概或或適當的斷章取意，要當事人提供的醫學貢獻簡述更缺少，有興趣知道詳細只有看原始資料的文獻，後者將存放在佳冬村祖堂。

部份早期草稿有分批給當事人看過与修改增補。最後的第六稿全本是寄給一直供給很重要或很多資料九位(楊敏文，林祖恩，楊光妹，林敏蘭，邱西蕃，林祖權，林祖道，林祖安與林家明)慢慢(一個月)複查，修正與增補。但還是免不了会有不少可或要改進的地方，還有，我很可能又弄錯或遺漏，請多告訴我，也許一年內能列出這些修正與增補寄給各位。

Epilogue and Acknowledgement

My father moved his clinics and pharmacy home in the Wan-chien Village from the commerce section in the Jiadong Village when I was in junior high. Before then, he usually came home mid-night, often staying overnight on the Japanese-style bed in the 2nd floor above the clinics with a couple of pharmacy assistant (I occasionally joined them). The assistants brought dinner from home to him. His and my uncles's kids were taken cared by our moms with my grand father as the family head. With so many people, meals were always eaten first by kids at 3 crowded tables. Vegetables were from gardens taken cared by my mother and aunts. Meat and fish were bought by my grandmother from vendor coming to our home or my grandfather at the Jiadong village market on his way home from work at my father's pharmacy. He often persuaded us to practice the Chinese writing with brush or to pull weeds, with cash rewards. Aside from these, he appeared to be an idler or a person who could not do anything else. My such feeling was furthered by an event. I & my cousin Tsu-xian found many string-bound Chinese novels in a wooden box on the ceiling of his study room, e.g, "Seven Knight & Five Brethren", "Cases by Judge Pun (Soo)", etc. We were extremely excited and took them out to read without his knowing. We had little Chinese books to read then. Those I read before were borrowed incomplete Chinese classic novels "the Momkey King", "Waterfront Bandits", "Story of Three Kingdoms" and "Gone with the Wind", all in Japanese and several volumes. In contrast, his elder brother who also lived in the same house were always busy at his Chinese medicin clinics and store and at home with his ornament fish pond (we kids played there too) or house affairs. This misunderstanding on my grandfather persisted for another 20 years or so after he had passed away. In 1976, I visited the old home after attending a week-long FASEB annual convention near the Disney Land in California. There at home and then my father told me for the first time a lot of stories about our families and villages. Some involved good or bad events of previous but should not be so for the subsequent generations. I still remember clearly many of these old stories. The one on my grandfather was especially the biggest one striking me hardly then, as briefed below.

It turns out that my grandfather was the smartest among 4 brothers and as such both his father and father-in-law (a scholar and the very first town mayor of Jiadong) taught him more enthusiastically the Chinese medicine than anybody including his elder brother Lin Qi-soo and cousin (in-law's son). Soon after the medical school (TGG-MS), the government drafted /or recommended youngsters for its entrants. My grandfather was in the list, but hid from government agents for certain reasons (married, distrust western medicine or Japanese). After a while, his much younger cousin Lin Chi-chung took his place for the draft and became the very western medicine physician in the Jiadong's Lin family. My grandfather continued his Chinese medicine practice with his elder brother Lin Qi-soo for about two decades until he worked full-time at the pharmacy attachment of my father's western medicine. Qi-soo's only son with high school education was working and learning with him then. Fifteen years earlier, in 1961-62 I saw Lin Chi-chung for the first time through a friend Mr. Yeh (Chi-chung's first wife's great nephew) a friend Mr. Yeh (Chi-chung's first wife's great nephew) at his home in the Lu-chow Town of old Taipei County and then many times since. He told me a lot of things, even invited me to stay overnight. He showed me his medical school class photos with the famous Dr. Tu (Kaohsiung Medical university's founder and first dean) and his large photo (8.5x11") taken at the Coal Mountain in the old imperial Palace in Pejin during his solo trip to the China mainland in his early 20s, which included his visit at the old Lin family home in the Canton Province (a brave trip as it was not peace time there then). He told me a couple of time that he let my father has his old clinics and attached pharmacy and helped my father in medical practice and he himself ten moved to other places to continue medical practice. He mentioned and appeared to be very thoughtful of my grandfather (their 6-year age difference rules out as childhood playmates). A Taita MS degree thesis (Ref. GA13) mentioned that "Lin Qi-soo had a Chinese medicine storeand financially helped the medical education of (Lin) Chi-chung and Qi-jen brothers, ..." who led the Jiadong's Lin family to have over 50 western physicians. As his brother & better trained, my grandfather must be involved in this activity and should also be credited, as suggested from Chi-chung's thoughtful memory of him a few decades later. Lin Qi-jen went from his busy clinics in the Pint-tung City to see my bed-ridden at home which is pretty isolated and surrounded on more than 3 sides by wet rice fields, also a few decades after he had practiced medicine in a far away city. Perhaps, my granfather was the one who promoted the Jiado's Lin family to become an "old and honorable family of physicians". Regardless, I have been for many years trying to correct my misunderstanding in earlier years on my grandfather. This could be my subconscious desire to write this booklet to apologize to him for so long.

A lot of data were generously furnished by subject members, relatives and friends. The Reference section listed most of them but could miss some. I greatly appreciate your helps, especially for multi-page CVs and genealogy booklets which took greater effort and time to send by e-mail. A stranger to me, Mr. Yang Ching-chao voluntarily not only e-mailed me genealogy booklets of Lin and other families but also hand deliver my mails and drafts to those who do not use e-mail. Some data were obtained from free website articles, which might show wrong person with the same name or inaccurate data as a number of them were corrected or verified by those concerned. For instances, one physician of our family have another guy with the same name, the same medical school only 1 year apart and the medical practice in the same city. Ten persons are listed in the register of the medical profession of the Taiwan health bureau; 8 are physicians or dentists and the one related to the Jiadong's Lin is in USA (11th with the same name). One whom I thought was related to us had a CV with a list of publications. I was so happy that I immediately entered some of them in the draft until I realized that most of the articles dealt with basic medical sciences and nothing to do with the surgery, his specialty as I also larned on-line (he, his brother and his parent ignored my numerous e-mails and USPS letters). I had to erase them with great disappointment. At this point, I would also mention that some relatives stubbornly refused my request for their data, even not moved by my several efforts by air mail and long international phone calls. I do not want to spend money on the commercial websites for more data. If I still work at university or corporation, more websites would be readily available to me, especially in my R&D position, to greatly reduced the deficiency of data. It is very difficult to properly or representatively brief some data, especially those related to work history. Even I did not do so for my own; others' would be harder. The summaries of medical contribution to be written by person himself are even more scanty. Whoever wants more of these data has to go to the original references which eventually will be stored in the ancestor hall

Most data ave been previously reviewed by the persons involved or their close relatives. The whole last (6th) draft was sent for final review to nine relatives who have furnished very important and/or large quantity of data (Minwen Yang, Tsu-en Lin, Grace Young, Mei-lan Lin, Hsi-chiang Lin, Tsu-chen Lin, Tsu-tao Lin, Tsu-an Lin and Homin Lim), and for correction and addition. It will still has room for improvement. I may make errors in the next step. Please let me know them and improvement to be made, so that perhaps I could list and send you the corrections and additions in a year.
