Appendix 6. Details of a medical contribution from Jiaodong's Medical Family: discovery & promotion of PAPP-A

(file: Appendix 6. M.C.)0804'15

The research & application of PAPP-A is beyond obstetrics, with > 2,221 titles in PubMed by June 30,2015 (550 for Down syndromes; 230, pre-clampsia; 260, cardiovascular). PAPP-A was first orally reported at the annual convention of FASEB (federation of medical basic sciences) on April 19, 1973 in Atlantic City, NJ by me Tsue Ming Lin; or earlier when it (abstract) was sent for its deadline date Dec. 14, 1972 (Rf1). The convention was attended by 25,000 scientists, with hundreds meets. In one meet I reported the isolation & designation of 4 pregnancy proteins as PAPP-A, -B, -C and D; and purification of 3 (A, C & D). Portion (Characterization) of this report was soon detailed in 1974 (Rf2), which was often cited as the first reference on PAPP-A. Our work dealt with PAPPs, not PAPP-A only. Our 2 reports with the word "PAPP-A" in the title are reviews in books thus not in the PubMed list. By our initiation of reagent exchanges & their reactivity comparison, PAPP-D was identified as the known hormone HPL; PAPP-C as SP1 reported by 2 labs in Russia & Germany years earlier; both PAPP-A & PAPP-B as newly discovered proteins by us; & many other proteins with >12 different names (e.g., PZP) as the same protein (Rf3,4). The PZP, not PAPP-A, is readily detectable in women taking hormone contraceptive & in late pregnancy. With similar molecular weight, same electrophoresis mobility & greater concentration, PZP would mask PAPP-A in the assay used then. An earlier article by our group on observations of multiple pregnancy proteins (PPs, PAPPs) (Rf5) used detecting antibodies which were not absorbed with plasma from women taking hormone contraceptive would reveal PZP but not PAPP-A. Besides, none of those PPs was named, isolated or characterized, but the article was mistaken by some as the first report on PAPP-A. For these findings I was invited to several international meets. Four of those I participated & are memorable as briefed below..

The first meet, "the 5th Meeting of the International Group for Carcinoembryonic Proteins: Placental Proteins", in Copenhagen, Denmark in August 1977, invited me & Dr. Halbert (my boss at UM). We planned to attend, but could not make the trip because the Meet could get only \$ 300 for travel expense for each of us & we had just committed all \$ 1500 travel funds of the NIH research grant for 4 color plates in a scientific paper (myocarditis). The Meet resulted in a report for a WHO publication, & a "Subcommittee on Pregnancy Associated Proteins of WHO" with us as corresponding members. It was organized by Drs.Horne & Rosen. We commented its draft only (Rf6). The group was instrumental in preparation of International Standard Pregnancy Plasma which promoted research & clinical application of pregnancy proteins, especially PAPP-A. The 2nd meet, "4th International Symposium on Endocrinology of Pregnancy: Pregnancy Associated Proteins" at University of Aberdeen, Scotland in July 1978, invited me but not Dr. Halbert. He is a good speaker. I thus asked the organizer Dr. Klopfer to have him in my place. The request was granted. A few weeks later, when I, but not he, received the airlines ticket for the event, I reminded Dr. Klopfer of my request for replacement but he insisted that I should go with the ticket (> \$1000) & Dr. Halbert could do reporting as we planned. Dr. Halbert was given another travel expenses, taking advantage of Dr. Halbert's son's working at an airlines. Dr. Klopfer had me chaired a session instead & we both attended the Symposium. Reports from 11 invited speakers were published as a book "Placental Proteins" (Rf3). In addition to the driving -through sightseeing the city in late afternoon, the city Aberdeen (pop. 220,000 busy with the North Sea oil fields) gave a welcome civic reception in the 1st evening in its 500-year art gallery with the mayor wearing traditional Scottish dress (kilt & sporran) and his wife at its entrance. The 2nd evening was an university reception. With a few hundred of meet participants already at tables, the invited speakers were held arm by their lady companion into a decorated hall & to a long table on the stage, following a bag multi-pipe music player with traditional Scottish dress & music. The wife of University of Aberdeen medical postgraduate division dean held my arm to the stage, like in a dream & no knowing before-hand. The 3rd evening was planned to be a farewell party at the beach but, with rain, held at Dr. Klopfer's house. On my way to Aberdeen, a stopover in London I took taxi to see the Buckingham palace & guard changing. Besides the airline ticket & expenses paid by the Symposium, I & Dr. Halbert received the royalty from the book, \$100 each. My only earning from writing. Earlier I & Dr. Halbert had a contract with a publisher to write a book "Cardiac Auto-immunity" with a 10% royalty, but abandoned after I completed 1st draft because I was too busy with this new research of PAPPs.

The 3rd meet, "International Conference on Placental Proteins", in Sydney, Australia in November 1981, had the original invitation to me lost in the University of Miami mail. Half a year later, the senior organizer Dr. J.G.Grudzinskas had an Australian Qantas travel agency in Ft. Lauderdale found me at Cordis Labs of my new job.. The agent gave me the conference invitation. With only a few weeks before the conference, I ignored it. After the conference closed, Dr. Grudzinskas asked me again to write a chapter for the book that was based on the conference. He reasoned that, in view of our pioneering work in this field, the book would appear incomplete without our contribution. I had to complete the manuscript in a month, as all other authors had their reports done before the Conference for the book (Rf4). The publisher gave authors 10 % discount on all its books, instead of royalty, beside a copy of the book (463 p.) free.

The 4th meet was organized by the Chinese (Taiwan) Society of Immunology & held in the Convention Center at the Veteran General Hospital in Taipei, Taiwan in August 1983. It was a 1-day Society's Annual Meeting, 1-day official tour & 2-day "Pre-congress Symposium on Human Tumor Immunology", followed immediately by the 5th International Congress of Immunology in Kyoto, Japan. At the Meeting I orally reviewed on PPs (Rf7). The 1-day official tour took invited speakers like I & their companions to the National Palace Museum, Tri-Service Hospital & its Medical School, National Taiwan University main campus, National Yang-Ming Medical College, etc. Most of these invited speakers were international scientists & also gave lectures at the Congress. The 2-day Symposium had several free sightseeing tours which I joined with my wife to the Chi-lung harbor 40 miles away, sea side rock park there & aboriginal village & show in the mountains, etc. We also went to the banquet dinners at the Grand Hotel hosted by the Academia Sinica (National Research Institute) the 1st & at the Kuopin Hotel by the Society next evenings. At the Congress in the National Kyoto Convention Center inside mountains off the Kyoto City, there was a dinner party for all 6000 guests. Most of us felt very hungry when meeting that day was over at 6 pm, rushed to the very beautiful garden, & grabbed foods & drinks at the entrance. We were full when we got to the garden proper with much better foods & drinks of many nationalities & shows on the stages & firework. The one week long Congress had free tours everyday, for which I accompanied my wife to see the old imperial palace, Nara streets, temples (1,500 in the city) & some new developments there. The four photographers posted 5x7 photos of these tours next day at the entrance of Convention Hall. I bought out all 5 with me in the picture to avoid "embarrassment", even though I attended many meet sessions and had presented a report on the ELISA for immune complexes (a 3-min. oral with 1-hr poster presentation). I had done all I supposed to do for the meet before the auxiliary activities.

Two unexpected findings in 1990s boosted studies on PAPP-A. The 1st one (Rf8) led to use it as a serum marker for the 1st trimester screening &, with 2 other markers, up to 100 % sensitivity for Down syndrome (trisomy 21 ; DS) & 95 % for trisomy 13 & 18 pregnancies (DSP), allowing early, more private & less traumatic termination of DSP, best at 9 weeks of gestation. PAPP-A thus helped to drop DS birth despite rise in DSP & to reduce expensive & riskier later invasive tests (amniocentesis & CVS). The 2nd one (Rf9) identified PAPP-A as a protease for Insulin-like Growth Factor Binding Proteins 4, & then 5 & 2 & active in cell growth & injury, leading it to roles in fetal growth, type 2 diabetes, unstable coronary plaques, serum markers for acute heart syndrome (diagnosis & prognosis), preeclampsia (early indicator), longevity, osteoporosis treatment, long-term hemodialysis (mortality predictor) & other pregnancy / fetal chromosome anomalies. The human gene for PAPP-A is on chromosome region 9q33.1. Our & other's earlier reports on its immunosuppressive & possible roles in protection of fetus from homograf rejection, on its activity in blood coagulation system, & on its analogue in animals have received less attention recently. The Mayo Found. Med. Educ. & Res. received 2 patents on PAPP-A.

附錄六. 佳冬杏林世家之医学貢獻詳述之一. PAPP-A的發現及推廣.

B. 10

PAPP-A 的研究與應用已不只在產科學. 美國的醫學網絡PubMed到2015的六月底已列出2221有關PAPP-A的題目(580與唐氏症; 230與孕早期驚厥前期症; 260與心血管病). PAPP-A最早公告是林祖銘,我於1973的三月在亞特蘭得市的美國基礎醫學學會聯合大會的報告,或截止日1972的12月14日前寄給該會的摘要(Rf1).這大會有25,000科學家參加,分幾百小組討論會,我在其一會上報告分離及命名四個妊娠血漿蛋白質為PAPP-A,-B,-C與-D,及純化其三(A, C & D).其一部份不久詳述在1974的美國婦產科學會雜誌(Rf2).這文章被引述為PAPP-A的第一篇參考文獻. PAPP-A在PubMed出現晚是因為我們的報告包括其他PAPP,不是只有PAPP-A而已.我有"PAPP-A在題目上的文章是在書內,PubMed不包括(Rf3,4).我們發起的試劑交換及比較它們的反應性証實PAPP-D是已知的荷爾蒙HPL,PAPP-C與一年前被蘇聯及德國兩研究所先發現的SP1是同樣的蛋白質. PAPP-A與PAPP-B 是我們的新發現,12个不同名的是PZP.這PZP在用荷爾蒙避孕藥婦女及孕婦的血漿中容易查到,它与PAPP-A有相近的分子量相同電泳速度,在當時用的測驗法会把較少量的PAPP-A掩蓋住,使PAPP-A看或查不到. 我們實驗室較早報導孕娠蛋白質的複雜性的文章(Rf5)所依据的測試是用沒經過用荷爾蒙避孕药的婦女的血漿處理過的抗体試劑,会一樣的只能查看到PZP, 沒有PAPP-A的踪跡,而且該实验研究也沒有對所有查看到的蛋白質定名,分離或定性,但那篇文章被某些人誤報為PAPP-A的第一个報導.因此這些我被邀請去幾個國際討論會,其中四我會與會及留念如下述.

第一个会是1977八月在丹麦首都哥本哈根開的“癌胚胎蛋白質國際研究組第五次會”.我与我上司哈教授被邀請要參加,但沒成行,因該會最後只能給每人\$300的旅宿費,而我們剛經美國衛生研究院NIH的批准把研究費內全部開會旅費\$1500用在我們的一雜誌篇“心肌炎”彩色微相片的印刷,該會的報告登在世界衛生組織的某刊物(Rf6)並成立該組織的“孕妊娠性蛋白質次委員會”,我們為其通訊委員在其草稿上出意見,該會後來推動製備了國際孕婦血漿標準樣本讓實驗室用,幫了推廣孕娠蛋白質,尤其是PAPP-A,在臨床上的應用的研究.第二个会是1978七月在苏格蘭的阿伯丁市開的“國際內分泌學討論會-妊娠性蛋白質”.我先前被邀請,我上司演講很好,我去信給主辦的蓋教授請求讓我上司可代替我去與會,答應了,但不久後只有我收到他寄來的來回機票(>\$1000),我寫信要他改給我上司,他回信要我用那機票,他会另外安排我上司的與會,利用我上司有一子在航空公司的机会,我們都去,他演講(Rf3). 我主持一節目.該會三天都有同行婦女參加的晚宴.头一晚是市長歡迎會在因北海石油再發達的阿市(人口22万)的500年博物館展覽廳內,穿古盛裝佩帶口袋的市長夫婦在門口與進門的人招呼.第二天在大学小礼堂,两百與會人坐在餐桌後,11位被邀請來演講(講稿收集成“胎盤蛋白質”)的各在一女伴牽手臂跟一位盛古裝吹着多管喇叭的進上舞台上來的長桌,女伴不上,我是啊!大医学院研究部院長夫人牽我進去,像在做夢,事前沒人告訴我這儀式,到門口才知道的.,第三天是在海灘的啤酒歡送,臨時因雨搬到蓋教授家,與會人可,有些在三天裡也用“大幅廣告板”報告過他的研究.在飛阿市停留倫敦九小時我搭計程車去逛了王宮附近,看了衛兵換班儀式,除了飛機票及住吃由會員担外,我与我上司哈教授在“胎”書的出版後還各得\$100.我生平唯一寫作收入. 几年前我們兩人與出版商訂約寫“心臟自体免疫”一書在我寫完草稿後放棄,因太忙於這剛開始的孕娠蛋白質的研究工作.

第三个会是1981的11月在澳洲悉尼市的“國際妊娠蛋白質討論會”.給我的邀請書掉失在我已不去上班但實驗室及辦公室還在的連亞密大飯店,當時剛在私人實驗室所開始新工作. 半年後該會的主要負責人葛士託在羅托堡市(遠市北邊隣市的澳洲肯達士旅行社的人找到我,給我該會的邀請信及文件,因会很迫近,我沒理它,但會開完後,葛博士寫信要我寫一篇論文入該會的書(463頁),他說我們開拓了那一類研究,該書不能沒有我們的文章,因為其他作者在會上已交上報告的文章,我就急忙的寫了寄給他. 題目是“ PAPP-A與PAPP-B的鑑定,純化與特性” (Rf4).除了送作者一本外,出版店給作者打9折買店的所有書.

第四個会是台灣中華免疫學會辦的在台北榮民醫院的大會中心,1983八月召開的.头一天是學會的年年會,次日是參觀,然後是两天的“集會前腫瘤免疫學討論會”,接著是在日本京都市的五天的第五屆國際免疫學集會.我在年年會上報告了妊娠蛋白質的免疫學的應用等,其全文登在該學會的雜誌上(Rf7), 在付印時沒發作者我的複查,有少數數字不全或錯誤.一天的參觀把我,我內人及邀請來演講的外賓(包括我)及他們的女伴帶去古宮博物館,三軍醫院及其國防医学院,台大校總區,陽明医学院等走馬看花或看研究實驗室,這些外賓在討論會及集會都演講.討論會兩天有給外賓女伴觀光的節目,我偕內人去逛了40哩外的基隆港,野柳海邊公園,山地村及其表演.我們也去了中央研究院在圓山大飯店及學會在國賓旅館招待外賓與女伴的晚宴. 在京都市的集會是在郊外山裡的國家大會中心.有一晚宴招待所有6000與會的人及陪伴.下午六點會開完會時大家都餓了,一起衝進後花園.在門口就抓食物吃,飲料喝,人到內有更好的各種吃喝的東西時我們都已飽了,園內有舞台上有日本舞,台上還放煙花,集會每天都有郊遊節目,我陪了內人去逛了舊皇宮,奈良市,几个和尚廟(據說有過1500个)及新開發的, 路上有人照相,把5x7吋的相片展示在大會中心進口室內,我把有我在內的5張全買,以免別人看到不大好,我聽了凡節會,做一個有關免疫複合體之酶素連接劑測試法的報告,完成與會的目的後才出去散心.

1990年代有兩個新發現促進了PAPP-A的研究. 头一个是PAPP-A是血清標本,與其他两个共用可在第一妊娠期間近100%測出唐氏綜合症(痴呆症;蒙古痴呆症;染色体21有3个)及95%有3个染色体13或18的胎兒的妊娠(Rf8). 患有這些不良妊娠胎早期並更少損傷的終止. 最好在妊娠9週時做這些. 第二个是PAPP-A是“類似觀島素之生長促進素4,5及2的蛋白質酶”(Rf9)及活躍在細胞生長與損傷,因此有功用在胎兒生長,第二類糖尿病,不安定的心冠血管塊斑,急心病的血清指標(預測及診斷),早期驚厥病之早期指標,寿命,骨鬆病治療,長期血透析之死亡預測以及其妊娠與胎兒異常染色體等. PAPP-A的基因在染色體區域9q33.1. 我們及其他人報導過它的免疫抑制及防止胎兒因異體移植被排斥,血液凝固系統上的作用,及動物類似物很少被注意到,其基因所得PAPP-A專利.

目錄

名單:

表一. 按血緣分組之佳冬杏林世家醫藥族人名單

表二. 按學校分組的佳冬杏林世家醫師, 牙醫及有關大專教/研究員名單.

前言與縮寫.

個人資料 (根據姓名與編號查)

第一章. 醫師, 牙醫師及有關博士, 大專教師或研究: 男性後代, 其配偶, 其半子及其半女.

第二章. 醫師, 牙醫師及有關博士, 大專教師或研究: 女性後代, 其配偶, 其半子及其半女.

第三章. 醫師, 牙醫師及博士/教授: 姻親, 母系血親 (八等親內), 其配偶. (N組).

第四章. 其他醫事專業, 如護理, 藥師, 醫事檢查師, 助產士等. (H 組)

第五章. 非醫藥直接職業卓著成就家屬(只列很少).

第六章. 主要 醫事/醫學貢獻: 短文(包括學術論文), 長篇或書(Bk), 及專利(Pt)部份題目

第七章. 參考資料: 原文, 以編號及英文姓名縮寫排; 粗斜體編號, 2015 新加/新成員.

跋與感謝
